The Engineer's Choice

... for Solutions

Application Profile

Repair Don't Replace!

Many companies in today's economic climate are continuing to look for products that will enable them to **REPAIR** rather than **REPLACE** their damaged or worn out Plant and Equipment -

Unique Polymer Engineering and Maintenance Polymers can and do **HELP** end users to keep vital equipment running smoothly with the minimum of outage and downtime costs whilst also enabling the re-use of the equipment rather than the high expenditure of replacement parts (that are usually more expensive as a spare part than in bought new and attached) -

One of the most successful products groups are the **UPS Ceramic Range** -

The Range consists of both Fluid Grade Engineering Ceramic as well as Heavy Duty Wear and Lining Ceramics -

Here are some recent examples from one of the UPS exclusive distributors around the world:
