Successful Application For Shell LNG Tankers

***Products Used TRK19000 Resin & Hardner TRK19007 Reinforced
Glass Tape***

Recent applications carried out on a LNG carrier for Shell.

Total area for repair was over 1754m².

Application was required to seal in the old material and to improve the cosmetic appearance of the lagging system.

The application is exposed to reduced temperatures and remains wet most of the time.

Application was painted after the wrapping was carried out.
