

Application Technical Data Sheet UPSTRK19000 – UPSTRK19007/9

Recent Application carried out by Unique Polymers approved applicator for a MAJOR POWER GENERATION company in the UK

- Unique Polymer Systems supply a very FLEXIBLE system to not only fully REPAIR any size PIPE LEAK – but also to ADD volume to wall thickness where it has been compromised by RUST – ABRASIVE OUTSIDE DAMAGE – WEATHERISATION etc.
- This system has the advantage over most other systems as it can be applied in MINIMAL SPACE requirement and offer immediate security.

The UPS Systems comprises of THREE main components.

- UPSTRK19000 Resin & Hardener
- UPSTRK19002 High Strength Industrial Cement A&B
- UPSTRK19007/9 Special reinforced micro weave Glass Tape

The system will allow FULL leak protection up to 112bar (1600psi) and for temperatures up to 170°C (338°F) on all types of material

- This system offer a VERY REAL alternative to the HIGH COST associated with the PHYSICAL removal and replacement of PIPES – especially in hard to reach places.
