

## **ANTI-CORROSIVE TAPES NEW FOR 2015**

Unique Polymer Systems LTD is now supplying a wide range of Anti-Corrosive tapes to protect critical infrastructure from corrosion and water ingress. The products are used in many versatile applications in the Oil & Gas industry, Waste Water, Petrochemical and many other industries, both on and offshore.

These Anti-Corrosive tapes provide permanent protection for the life of the asset and only require one application.

### **UPS TR1 Inner Tapes & UPS TR2 Outer Tapes**

This system requires two different types of tapes, first the Inner tape which is applied to the primed surface and the second layer which is applied on top. This system will provide lifelong protection from corrosion and water ingress to any pipework in which it is applied to. Both tapes provide a great service temperature of -40°C to 85°C (-40°F to 185°F), and are available in three different thicknesses; 0.5, 0.65 and 0.8mm

### **UPS TR6 Subsea Marine Tapes**

This Unique Anti-corrosive Tape can be applied in subsea conditions with no specialist equipment or training and requires very minimal tension when wrapping, making it ideal for difficult situations. The tape has been developed for protection of subsea pipelines, risers and pilings. Splash and inter-tidal zones where areas are exposed to waves, seawater spray and an atmosphere with a high concentration of salt and oxygen.

### **UPS TR5 Visco-Elastic Tape (Paste Version Available)**

A high performance polyolefin material which retains the dual characteristics of the solid and liquid adhesive. This Unique Visco-Elastic tape will provide 30 years plus service life when applied to the corrected primed and treated surfaces. It has outstanding chemical protection and self-healing properties for light defects, reducing the need for unplanned maintenance.

### **UPS TR3 Joint Wrap**

This cold applied tape coating system for Anti-Corrosion protection for Field Joints, Fittings, Pipework and other key joints, can be applied both above and below ground, making it an extremely versatile tape wrapping system.
